the Group has been temporarily sold to a market price of 28€/MWh, instead full "FiT". In addition, it should be noted, that "Kosava Phase I" received half of the FiT during trial period, that ended in February 2020.

Operating expenses amounted to RSD 1,104,387 thousand while were RSD 482,159 thousand in 2019. This result was significantly affected by the suspension of the Feed in Tariff during first half 2020 as above mentioned and the obtainment of the full FiT for Kosava Phase only at the end of May 2020. Without Serbian Government COVID 19 measures and the recognition of full FiT for Kosava Phase I since January 2020, Revenues, EBITDA and profit before tax should have been higher for RSD 512,569 thousand compared to actual results at the end of 2020.
